Pain Points in Today's Offload Workflow
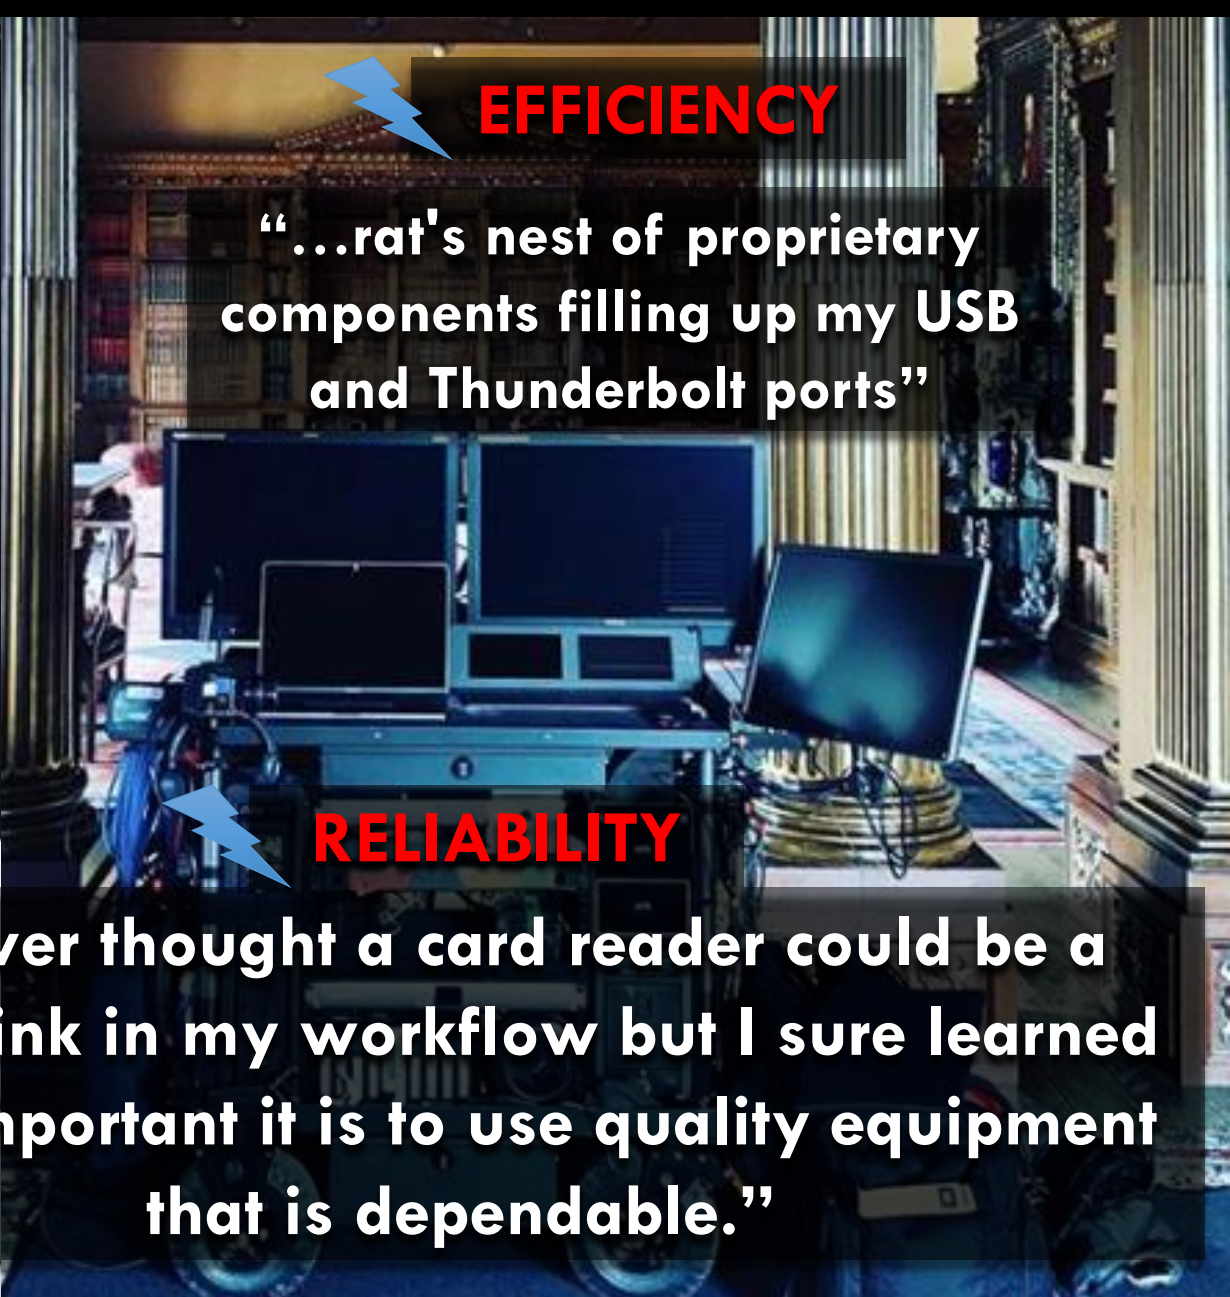

COST

"We have people standing around ingesting all day"

EFFICIENCY

"…rat's nest of proprietary components filling up my USB and Thunderbolt ports"

RELIABILITY

"I never thought a card reader could be a weak link in my workflow but I sure learned how important it is to use quality equipment that is dependable."

Solution Overview

For Creative Pros who are tired of burning time and money with slow media offloads, **PRO-DOCK 4** with **PRO-READER** devices installed bridge capture and ingest with a scalable offloading solution that saves critical time and money on multi-camera productions.

PRO-READER
Product Overview

High-performance media offloads:
- USB-C (10Gbps) interface for fast transfer speeds
- Maximizes the speed of the memory card
- Thermal management to keep the card cool

Modular for convenience and efficiency:
- Stackable design
- Designed for the most common camera media
- Works with USB-C and Thunderbolt

Designed to pair with PRO-DOCK 4 to minimize downtime:
- Customize your PRO-DOCK 4 with a combination of readers
- Plugs into the USB interface on the dock
- Maximize efficiency
